

TELEGROW PROJECT

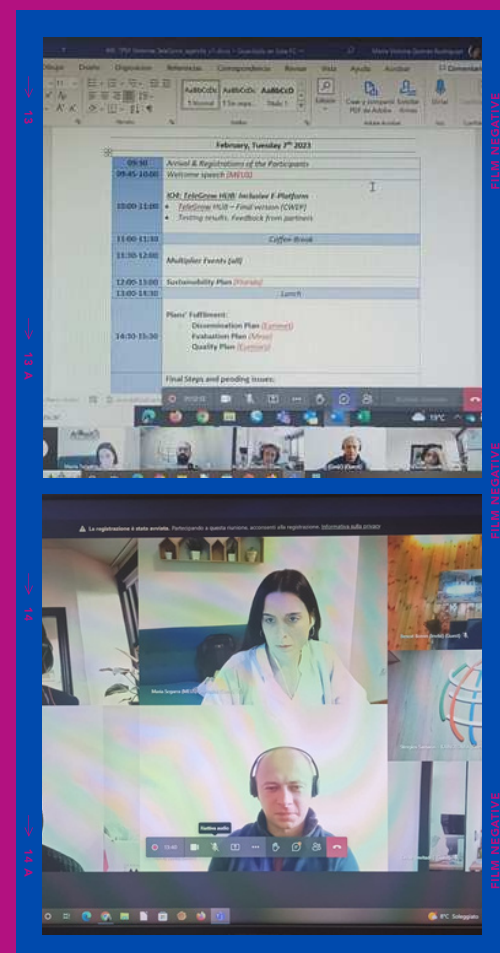

Enhancing the Teleworking Digital Skills for the Middle aged employees

THE LAST SIX MONTHS

The Telegrow project <https://telegrow.erasmus.site/> is now nearing the end of its implementation. The cooperation between the partners has always been one of great understanding, utmost seriousness and great adherence to deadlines. Therefore, it has always proceeded without any problems by delivering all the outputs stipulated in the schedule in a timely manner.

During the course of the past six months, the Partners have had three opportunities for meetings to discuss the products produced and plan the next final stages of work. The events held on 08/07/22, 06/10/22 and 21/11/22 were held online.

LTTA IN LARISSA - 5/9 SEPTEMBER 2022

The training week (LTTA) was held in Larissa (Greece) during the week of September 5-9, involving 1 Staff member, 1 VET trainer, 1 VET learner 50+ from each partner.

The participants, after learning the results of the IO1: TeleGrow Interactive Report on the national situation of teleworking +50 and understanding the usefulness of how to use the IO2:How to stay gOLD Guide, experienced the IO3: How to TeleGrow Old Training Modules prepared by the project partners and tested their effectiveness and methodological and educational validity.

The interactive sections and workshop activities created an atmosphere of great complicity and friendship among the participants.

At the end of the training event, MEUS shared a satisfaction questionnaire to fill out by the event's participants. All feedbacks were very positive, a testament to the good work done by the partnership

THE STATE OF ART OF THE PROJECT

The month of October was used to translate into each partners' languages both the **IO3: How to TeleGrow Old Training Modules** as well as the related PPTs presentations that each partner had made for the LTTA in Larissa. This was also uploaded to **the IO4: Telegrow Hub e-learning: Inclusive Platform** which can be shortly accessed, subject to registration.

Outputs to be completed by the project deadline of 02/28/2023 include the Europass procedure for some partners, the organization of the Multiplier Dissemination Events that will be carried out in each individual Country the last month of the project, and the drafting of the Sustainability Report.

All project activities have been and continue to be constantly updated and implemented by the partners on the official website <https://telegrow.erasmus.site/> and on the Facebook page dedicated to the project. Many articles have been published in the local and online press especially after the participation in the LTTA in Larissa.

The next partnership event is scheduled for **February 7-8 in Valencia** at the Final Event organized by the Lead Partner FLORIDA. On that occasion all the outputs produced throughout the project will be presented to the audience.
