SKILLS4VETAPP
UPSKILLING VET TRAINERS TO ACT AS APPRENTICES COACHES

Newsletter n.1
May 2023

THE PROJECT

Skills4VET-app is a European Project that aims to equip VET trainers and providers with knowledge and tools to support, guide and motivate VET learners towards apprenticeships. Having been equipped with the required knowledge, VET trainers will be capable to reach people with fewer opportunities, low skilled, unemployed or those living in rural areas. The project will last 2 years and involves two partners from Greece, one from Italy and one from Spain. The main project's results will be the Skills4Vet-app Digital Report and the "How to App-skill VET trainers" Digital Roadmap.

KICK-OFF MEETING

Partners met online on the 12th of April to set the online working session and define the project first activities which focus mainly on the research phases. Questionnaires have been already distributed among the targets group to collect data for the first project product: the Skills4VET-app Digital Report. Stay tuned!
